

How to get the original OSS source code

1. The Link

<http://android.git.kernel.org/>

2. Method to get the source code

```
mkdir mydroid
cd mydroid
repo init -u git://android.git.kernel.org/platform/manifest.git -b android-1.0
repo sync
```

note: "android-1.0" is the tag

3. The OSS code location

Most OSS code locates in "external" folder
